 Office Action Summary	Application No. 10/691,365	Applicant(s) BROWNE ET AL.	
	Examiner Melanie Torres	Art Unit 3683	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The final rejection mailed January 26, 2005, has been withdrawn and a new rejection has been applied in view of prior art found by the examiner during a search update.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 8, 9 and 11-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Deshmukh et al.

Re claims 8, 9 and 11-13, Deshmukh et al. teach a magneto-rheological damper, the damper comprising: a cylindrically shaped housing (701); a magneto-rheological fluid disposed in the cylindrically shaped housing; a piston assembly (703) disposed within the cylindrically shaped housing in sliding engagement with the cylindrically shaped housing defining a first chamber and a second chamber, wherein the piston assembly comprises an open cell porous media comprising a plurality of fluid passageways extending from the first chamber to the second chamber (broadly interpreted as the communication through the piston 703) and at least one electromagnet (709) centrally disposed in the piston assembly; and a power supply in electrical communication with the at least one electromagnet. (Figure 7)

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Deshmukh et al. in view of Namuduri et al.

Re claim 14, Deshmukh et al. do not teach a third chamber defining a floating piston and an end of the housing, wherein the third chamber is filled with an inert gas. Namuduri et al. teach a third chamber defining a floating piston (38) and an end of the housing, wherein the third chamber is filled with an inert gas.

Allowable Subject Matter

6. Claims 1-7 are allowed.

7. Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Art Unit: 3683

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lun teaches a magnetorheological damper comprising an open cell porous media.
